

REMARKS

This application has been carefully reviewed in light of the Office Action mailed January 6, 2004. Favorable reconsideration is respectfully requested.

In the Office Action, the Examiner objected to the drawings since they did not show a feature recited in claim 14. In response, claim 14 has been amended to clarify which part closes the opening (20). It is clear now that the *body* is closing the opening and Figures 5 and 6 show this. Therefore, Applicants respectfully request withdrawal of the drawings objection.

The examiner objected to the specification due to a couple of informalities. First, a single reference character was used for two different parts. The specification has been amended to overcome this objection. The incorrect number given to one part has been deleted and replaced with the correct number. The examiner also requested that "GSM" be spelled out completely. The specification has been amended to incorporate this request.

In the Office Action, the Examiner rejected claims 14-20 due to a nonstatutory double patenting rejection. Claims 14-20 remain pending in this application. Favorable reconsideration is respectfully requested.

PATENT
Serial No. 10/616,256

Examiner states in the Office Action that a terminal disclaimer filed in compliance with 37 CFR 1.321(c) may be used to overcome the double patenting objection. A terminal disclaimer is included along with this response to the January 6, 2004 Office Action. Applicants respectfully request withdrawal of the objection to claims 14-20.

In view of the above, it is respectfully submitted that the present application is in condition for allowance, and a Notice of Allowance is earnestly solicited. If any informalities remain, the Examiner is requested to telephone the undersigned in order to expedite allowance.

Respectfully submitted,

CERTIFICATE OF MAILING
